Step 5: Separate the stock from the receiver. Pull up and out.

(Replace it with the M*CARBO Spring Kit using the flathead.)

Step 6: Now we want to remove the factory trigger sear spring.

Step 7: Pre-travel adjustment. Use the .050 Allen Key to tighten up to your desired amount of travel.

Step 8: Now to put it back together. Take your stock and press that down onto the receiver.

Step 9: Screw back on the front screw(shorter) and then place the trigger guard back in. Then tighten back in the screw in the back(longer).

Step 10: Insert the bolt back in and hit the bolt stop.

Step 11: Do a quick function check then place the weapon on safe then pull the trigger and nothing should happen.

Step 12: Take off the safety lock, then pull the trigger again. Everything should work and feel great!

Step 13: Try a few trigger pull readings and the M*Carbo Spring Kit should reduce your trigger pull by half and improve accuracy.

Before installing Browning AB3 Trigger Spring Kit

After installing Browning AB3 Trigger Spring Kit.
***The Browning AB3 Trigger Spring Kit should reduce the trigger pull by about 50%
