Step 9: You will find your Recoil Spring and Guide Rod at the front of the Frame. Put them out of the Frame, keep them together and set them aside.

Step 11: Press down on the Sear using your Micro Tip Flat Head Screwdriver so that you can release it from the linkage on the side.

Step 10: Next you're going to focus on the Sear located at the back of the Frame.

Step 12: Next you're going to use your 1/8" Punch to continue to push down on the Sear and use your Screwdriver at the same time to pry out the linkage.
