

# MCARBO Savage 64 Trigger Spring Kit

Installation Instructions [www.mcarbo.com](http://www.mcarbo.com)

For more info or support: [info@mcarbo.com](mailto:info@mcarbo.com)

**Attention:** Before you begin, be certain the firearm is clear and safe.

*Follow the instructions in your owner's manual to remove the trigger mechanism from your rifle.*

**Step 1:**  
Remove these three screws to release the trigger mechanism and magazine well from the barrel.

**Step 2:** Remove the trigger return spring by compressing it with your fingers.

**Step 3:**  
Remove this C-clip

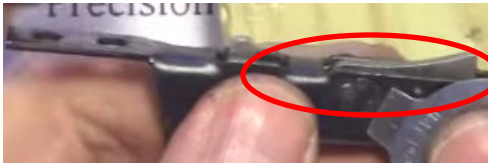

**Step 4:** Tap out the pin and remove the sear.

**Step 5:** Remove the stock sear spring.

**Step 6:** Insert the MCARBO sear spring. Re-insert the sear, the pin and C-clip that holds it all in place.

**Step 7:** Insert the MCARBO trigger return spring

**Step 8:** Re-install the trigger assembly onto the receiver

**Step 9:** Re-install the magazine well onto the trigger assembly. Then re-insert the complete mechanism back into the stock.

**After you have reassembled your Savage 64 make sure you do a function check.** Cycle the action and load a snap cap or spent shell casing into the chamber. With the rifle safety on "safe" and the barrel pointed in a safe direction, verify that the rifle will not fire when you attempt to pull the trigger. Place the safety now on "fire" and now verify the hammer falls.
