

APPENDIX D8 – Pistol Caliber Carbine Division

1	Minimum Barrel Length	None (See special conditions.)
2	Approved/Permitted Calibers	9mm, .357 Sig, .40 S&W, 10mm, .45 ACP
3	Minimum Power Factor	125 (Minor Scoring Only)
4	Maximum Velocity	1600 FPS
5	Magazine Capacity Limit	None
6	Must have stock attached and be capable of being fired from shoulder position	Yes, see 5.1.10.
	<ul style="list-style-type: none"> • Note: Sig Brace and any variant thereof is not allowed • Handgun to carbine conversions are allowed, provided they meet the criteria above. (See Special Conditions) 	
7	Sling use authorized	Yes
8	Optical sight/electronic sights permitted	Yes
9	Compensators/Muzzle Brakes permitted	Yes
10	Max. distance of mags/speed loaders from inner side of belt	Magazines – 2 1/8" (width of an overlay).
11	Rule applies	Yes
12	Restriction on position of mag pouches	Magazines must be carried on the belt or in apparel pockets. See rule 5.2.4. No restriction on location on the belt. No thigh rigs or tie-down magazine holders.
13	Flash Hiders permitted	Yes
14	Suppressors permitted	No
15	Rules References	All references to "handgun" are deemed to apply to PCC as well, except where the terms "holstering", "drawing", or "re-holstering" are referenced, and where otherwise noted. PCC specific rules are identified within this rules publication.
16	Lasers/Flashlights	Yes
17	Magazine restrictions	No side-by-side magazine couplers allowed. End-to-end coupling/extension is allowed.
18	Full Auto/"Burst" Capabilities (one trigger pull fires more than one round--see special conditions)	Permitted, but semi-auto function only, see

The 2020 versions of the USPSA and SCSA rulebooks are now available.

[SEE THE NEW RULES! >](#)

19	Binary Triggers (firearm fires once on trigger pull and once on release)	Use not allowed, see [redacted]
----	---	---------------------------------

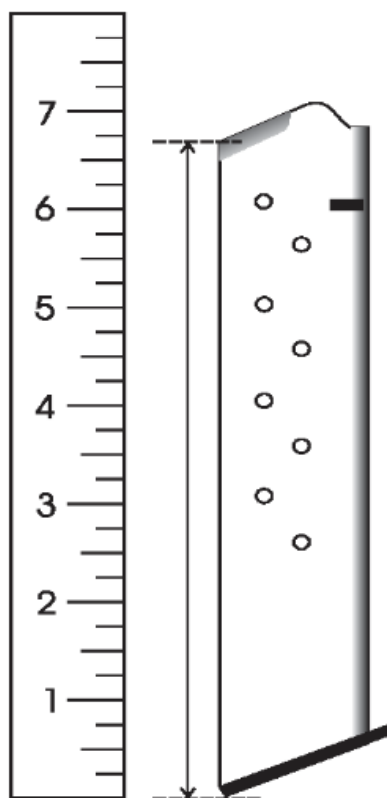

Special Conditions:

1. Short Barreled Rifles (SBR's) are permitted provided that the competitor is in full compliance with all state and federal laws and regulations concerning ownership and transport of the SBR.
2. Handgun to carbine conversions are allowed as long as the conversion is shot in PCC division, and meets the criteria in #6.
3. Full auto, burst fire, mechanically aided bump fire, and binary fire will result in a procedural on the first instance, and a disqualification for any subsequent occurrences, (unsafe gun handling, see [redacted]).

The 2020 versions of the USPSA and SCSA rulebooks are now available.

APPENDIX E1 – Magazine Measurement

Magazine Measurement Procedure

Measurements on magazines are as follows:

5.561" (141.25 mm)

6.742" (171.25 mm)

The primary magazine measuring device shall be the EGW mag gauge. A magazine needs to conform to the length limit as well as the gauge to comply with our rules. The gauge width extends to infinity. No curved, collapsible, extendable, or similar types of magazines will be allowed. If a base pad does not conform to the configuration of the gauge, a ruler may be used to measure the overall length as pictured above.

The magazine shall be placed into the gauge without significant force or depression. It must lie so that the back of the magazine is flush against the gauge. The follower may be depressed, or slight pressure may be applied, to ensure proper fit. Some non-telescoping base pads fit loosely on the bottom of the magazine, hence the magazine may need to be "clicked in" on the mag gauge, using slight pressure.

If the magazine fit or procedure is questioned, the Range Master's call will be final.

The 2020 versions of the USPSA and SCSA rulebooks are now available.
